I Seton Medical Center/ Seton *Coastside* 2013 Community Health Needs Assessment:

Mission of Seton Medical Center and Seton *Coastside*

In the spirit of our founders, St. Vincent de Paul, St. Louise de Marillac, and St. Elizabeth Ann Seton, the Daughters of Charity Health System is committed to serving the sick and poor. With Jesus Christ as our model, we advance and strengthen the healing mission of the Catholic Church by providing comprehensive, excellent healthcare that is compassionate and attentive to the whole person: body, mind, and spirit. We promote healthy families, responsible stewardship of the environment, and a just society through value-based relationships and community-based collaborations.

Description of the Community

San Mateo County, located on the San Francisco Peninsula is made up of twenty cities and towns and is bordered by the City of San Francisco on the north. Seton Medical Center is a major tertiary care center serving northern and central San Mateo County and the most southern part of San Francisco County (Attachment E). Seton *Coastside* in Moss Beach provides the only 24- hour physician-staffed standby emergency department on the coast between Daly City and Santa Cruz. Seton *Coastside* also provides a skilled nursing unit, an acute-care unit, radiology, laboratory, and rehabilitative services. Seton *Coastside's* service area constitutes a large geographic area that extends 45 miles from Montara south to the Santa Cruz County line.

Real per capita income in San Mateo County in 2010 was \$68,582, and the average weekly wages in 2010 were \$1,450, down 13% from 2000. A single parent with two children must earn approximately \$78,000 annually to meet the family's basic needs. San Mateo County's rental and child care costs exceed the state's average. In 2011, San Mateo County's projected rent for an apartment was \$1,916 and child care costs were \$1,715 for a single parent family with an infant and a school-aged child. For low-income individuals and families, the overall improved economy does not translate to a better way of life. In order to make ends meet, low-income residents sometimes work two or three jobs, working longer hours with fewer benefits resulting in less time spent with their children. Further, they live paycheck to paycheck, leaving them vulnerable to transportation emergencies, medical crises, and insecure housing circumstances. Low-income individuals and families live on the verge of instability.

There remain radical differences by community within this overall service area in terms of racial and ethnic composition. Asian and Hispanic residents are expected to continue to become an increasingly greater proportion of the population. The Asian/Pacific Islander population is primarily clustered in Daly City while the Hispanic population is primarily clustered in South San Francisco and 50 percent of the coast side, both Seton and Seton *Coastside* service areas. San Mateo County has 44.7% of persons

over the age of 5 speak a language other than English at home. This is higher than the state percentage of 43.0%.

San Mateo County is clearly one of California’s richly ethnically diverse counties. The Asian/Pacific Islander population and Hispanic/Latino population are primarily clustered in Northern San Mateo County and along the Coast. In Daly City, a primary service area of Seton, 52% of the residents are foreign born and 68% of persons over the age of five speak a language other than English at home. South San Francisco, our second largest service area has 43% foreign born and 60% of persons over the age of five speak a language other than English at home.

	Population	% Asian	% Hispanic or Latino	%Foreign Born	Persons over the age of 5 speak language other than Eng. in home
County	739,311	25.8	25.6	34.1	44.9
Broadmoor	4,025	UA	UA	UA	UA
Burlingame	28,158	20.3	13.8	27.4	34.0
Brisbane	3,597	UA	UA	UA	UA
Colma	1,191	UA	UA	UA	UA
Daly City	103,621	55.6	23.7	52.2	68.1
Half Moon Bay	11,842	4.3	31.5	23.3	34.1
Pacifica	38,390	19.4	16.8	21.2	27.1
San Bruno	40,165	25.4	29.2	37.1	48.4
S. San Francisco	60,552	36.6	34	42.9	60.3

While other age groups will decrease in terms of percent of county population (0-19 years, 20-39 years, 40-59 years) from 2010 to 2050, those 60 years and older will increase from 18.9 percent to 30.9 percent. Asian/Pacific Islander and Hispanic seniors will comprise the largest proportion of seniors in San Mateo County in 2050. At the other end of the age spectrum, the ethnic makeup of children under the age of 15 years is projected to be Hispanic, Asian/Pacific Islander, White, Black and multi-race in 2050 (percent of population).

By comparison to the rest of San Mateo County, the residents Seton serves reflects a larger percentage of Asians, Hispanics/Latinos, foreign born and persons speaking a language other than English in the home. This rich diversity is a recognized barrier to accessing health care due to language, culture and care based on race. The community needs assessment reveals that a larger percentage of Northern San Mateo County residents are at health risk and lack insurance.

2013 Community Health Needs Assessment Process

Who was Involved in the Assessment

The Healthy Community Collaborative (HCC) was formulated in 1995 of hospitals and health organizations in San Mateo County to focus on and address community health needs of the county residents. The HCC oversees the triennial community health needs assessment: Health & Quality of Life in San Mateo County. The HCC and individual hospitals utilize the Community Health Needs Assessment to identify opportunities to be addressed through programs or policy. These initiatives and programs are developed to address community health and service efforts which will benefit and improve the health of local residents. In addition, the Hospital Consortium of San Mateo County which includes the leadership of the hospitals and the local health department provides direction for the HCC regarding countywide priority health initiatives.

As in 1995, 1998, 2001, 2004, 2008, 2011, the Collaborative continues to actively determine the indicators to be studied and conducts a community assessment of San Mateo County. This study is part of a larger and longitudinal study, encompassing many years of data and trends and should be viewed in that context. Note that, for the purposes of this assessment, “community health” is not limited to traditional health measures. The definition includes indicators relating to the quality of life (e.g., affordable housing, child care, education and employment), environmental and social factors that influence health, as well as the physical health of the county’s residents. This reflects the Collaborative’s view that community health is affected by many factors and cannot be adequately understood without consideration of trends outside the realm of health care.

A copy of the complete Community Health Needs Assessment, is available on the Internet on the San Mateo County website or Peninsula Library System website at <http://plsinfo.org/healthysmc>

How the Assessment was Conducted

The primary research for this project was gathered through a telephone survey of adults in San Mateo County. The *2013 Health & Quality of Life Survey* addressed a variety of issues, including:

- Measures of health risk behaviors (e.g., smoking, physical inactivity, high blood pressure, overweight prevalence) and prevention services (e.g., cancer screenings and access to medical care), using many questions from the Center for Disease Control and Prevention’s (CDC) Behavioral Risk Factor Surveillance System; and
- Quality of life indicators, including such items as housing, social capital, child care, transportation, and education.

Health Needs Identified

The assessment highlights that in many areas San Mateo County residents are healthier than in many other places. However, the data also demonstrates that preventable diseases are on the rise and so we must do more to prevent these diseases from occurring in the first place. It also shows that health is not distributed evenly across the population and there are many communities that still do not experience good health and a high quality of life. (Attachment B) The following health needs were generated from the primary and secondary data as well as input from focus group participants.

<i>Health Need/Condition</i>	<i>Indicators of Need</i>
Obesity	Percentage of people who are obese is rising
Cardiovascular disease, heart attack, & stroke (cerebrovascular disease)	Percentage of people who exhibit more than one risk factor for cardiovascular disease is not decreasing
Substance use (ATOD)	Youth drug arrests and binge drinking are rising
Poor oral health	High self-reported lack of access to dental care in youth, and percentage of people who lack dental insurance is rising
Violence	Perception of violence and lack of neighborhood safety is a concern, particular gang and domestic violence
Infectious disease	Tuberculosis is increasing
Diabetes	Percentage of people with diabetes is continually rising
Poor mental health	Poor mental health indicators are staying the same or rising, i.e., depression and suicide rates
Cancer	Breast, cervical, colorectal, and prostate cancer incidence are failing Healthy People 2020 benchmarks
Births	C-sections are rising and some ethnicities receive inadequate pre-natal care
Asthma & respiratory conditions	Asthma prevalence is worsening
STDs, including HIV-AIDS	HIV screening is low among some populations; STDs are on the rise

Participants mentioned a variety of drivers for these various health needs, such as:

- Lack of affordable housing leading to overcrowded conditions
- Disparities among subpopulations
- Pedestrian safety
- Nutrition/malnutrition

- Media impact on mental health and on gang interest
- People working in the county who live elsewhere due to high housing costs

Participants identified additional health needs that they felt were of note:

- Accidents and injuries
- Hospital readmissions
- Sexual abuse/trafficking of teens
- Chronic disease (both age-related and due to disabilities)
- Health of older adults
- Suicides
- Child maltreatment among African Americans and immigrants
- Cognitive issues

Community Assets Identified

The assessment identified a number of strong assets summarized in Attachment C, including the Healthy Community Collaborative Hospital members' community benefit plans.

Summaries: Assessments and Priorities

Attachment B lists all of the needs identified and describes the priority setting approach. In summary, Seton Community Advisory Committee prioritized the following needs: access, health needs (obesity and diabetes), cancer prevention and healthy births.

Next Steps

The Healthy Community Collaborative of San Mateo County continues to meet monthly to receive updates on health needs and community assets. We recognize that asset mapping should continue to be part of our regular discussions.

The Seton Medical Center Community Advisory Committee is expanding committee membership to ensure representation from all geographical areas we serve. Additionally the CAC members will develop a plan for health advocacy throughout the community. We are also considering development of a Community Advisory committee for the Coastsides.

II Seton Medical Center/Seton Coastsides Implementation Plan

How the Implementation Plan Was Developed

Seton Medical Center (SMC) and Seton Coastsides (SMCC) stand as vital and vibrant expressions of the Daughters' of Charity mission to serve the sick and the poor. The Community Benefit Implementation

Plan (CBP) is driven by the commitment to the Daughters of Charity's mission by the Seton Medical Center Executive Team and the Community Advisory Committee (Attachment A).

The Seton Medical Center Community Advisory Committee (CAC) members have been meeting quarterly for nearly 20 years to review community needs assessment results and provide recommendations for prioritizing community needs and identifying the community benefit plan. CAC members are leaders in the community representing schools, places of worship, community-based organizations and businesses, who meet quarterly to discuss our community benefit plan and receive updates on the accomplishments of the CBP's goals and objectives. The plan is also presented to the SMC Board for review, discussion and approval.

The 2013 - 2015 implementation plan was developed based on the San Mateo County Community Needs Assessment and a review of the hospitals' existing community benefit plan. As the largest provider of inpatient services to Medi-Cal patients in San Mateo County, SMC/SMCC plays an important role in addressing the unmet healthcare needs of the low-income and underserved in the County. SMC/SMCC's 2012-13 fiscal year unpaid costs of Medi-Cal are \$24,366,208. Charity care or traditional financial assistance for 2012-13 fiscal year is \$2,522,716.

Major Health Needs and How Priorities Were Established

The Seton Community Advisory Committee (CAC) reviewed the summary of the 2013 San Mateo Community Needs Assessment and participated in the San Mateo County Healthy Community Collaborative Focus Group health needs prioritization. By comparison to the rest of San Mateo County, the residents Seton serves reflects a larger percentage of Asians, Hispanics/Latinos, foreign born and persons speaking a language other than English in the home. This rich diversity is a recognized barrier to accessing health care due to language, culture and care based on race. The community needs assessment reveals that a larger percentage of Northern San Mateo County residents are at health risk and lack insurance. The CAC identified the cross cutting drivers for the community and prioritized community health needs for the Community and Benefit Implementation Plan through discussion of the following:

- 1) What are the health needs of the community we serve?
- 2) What resources are available to meet those needs?
- 3) What community resources are available to address those needs?

The prioritized community needs include the following:

- 1) Health Access
- 2) Health Needs (Obesity and Diabetes)
- 3) Prevention of cardiovascular disease, heart attack, and stroke

- 4) Cancer Prevention
- 5) Healthy Births

	County	North County	Coastside	Asian-Pacific Islanders	Blacks African American	Hispanic Latino
% Overweight	55.4	57.6	61.5	45.7	63.3	61.5
% Obese	21.7	24.6	21	12.3	30.2	31.4
% Diabetic	10	13.9	7.9	10.5	14.9	10.8
% Exhibit Healthy Behaviors	5.4	4.6	4.4	2.9	5.6	5.8
% Cardiovascular Risks	85.4	87.6	85.2	84.4	91	86.5
% Adults living 200% below poverty level	18.9	19.7	13.6	16.7	33.0	37.8
% Lack Health Insurance	12.3	17.8	14.1	14.0	15.1	17.5
% of births receiving less than adequate prenatal care. Largest gap Pacific Islanders 37.1				37.1 (Pacific Islander)	23.4	22.9

II. Implementation Plan: Description of What Seton Medical Center Will Do To Address Community Needs:

(Note: Language capacity and cultural sensitivity will be a component of all action items.) Cross Cutting

1. Access

Need: Increase access to healthcare and health information, focus on prevention and promote healthy communities.

Action A:

- Seton Medical Center will provide space for the RotaCare Free Clinic at Seton and support for *Coastside* RotaCare Free Clinic. These clinics provide basic urgent medical care for the uninsured one evening each week.

Outcome:

- Access for uninsured community members for urgent health care needs and follow up health care through referrals. In addition, to provide information during clinic hours on the ACA to all RotaCare patients through Seton's HBRC. Vaccination clinics are held in partnership with San Mateo County.

Measurement:

- Provide access for individuals with urgent health care needs who have no insurance and provide support to over 1,500 annual patient visits.

Action B

- Seton Medical Center Health Benefits Resource Center (HBRC) information and referral service located on-site will provide free confidential assessments, referrals to community resources and assistance in completing applications for free or low cost health resources, including through the ACA.

Outcome:

- More community members will gain access to health insurance through the HBRC.

Measurement:

- The HBRC will conduct at least 300 health eligibility screenings and submit 150 new applications to the County.

Action C:

- Increase collaboration with local community-based organizations to provide a continuum of care and services. These organizations include: Daly City Peninsula Partnership, Daly City ACCESS: Healthy Aging Response Team, Daly City Youth Health Center, Clinic by the Bay, San Mateo Healthy Community Collaborative, Get Healthy San Mateo County, local community centers, and Chambers of Commerce.

Outcome:

- Create partnerships by looking at opportunities to refer patients to community resources, serve on advisory committees or board of directors, and provide sponsorships to support community health initiatives.

Measurement:

- Increase number of Seton staff and physicians who volunteer with hospital's identified partners. Increase number of health outreach events.

2 and 3: Health Needs: 1) Obesity 2) Diabetes 3) Cardiovascular disease, heart attack, and stroke

Need: The percentage of people who have obesity and diabetes is rising. The number of individuals who exhibit healthy behaviors continues to decline. The percentage of people who exhibit more than one risk factor for cardiovascular disease is increasing (high blood cholesterol, blood pressure, diabetes, smoking, diet, no exercise, alcohol consumption, and family history).

Action: #1

- Promote heart healthy exercise programs and "Instant Recess" at health events, local faith based organizations, schools, community centers, and at as many community outreach events in which the hospital participates. Support weekly exercise program at our local mall through the walking program *Walkabout/TalkAbout*. Discuss the benefits of exercise on preventing diseases such as diabetes and heart problems.
- Provide Low cost cholesterol and diabetes laboratory screenings at Seton and at community events.
- Provide blood pressure screenings at health fairs and at educational presentations.
- Provide diabetes education, including managing diabetes through support groups, access to nutrition information, glucose monitoring, diabetes meter instruction, and wound care education.
- Provide nutrition education including the benefits of low sugar content in food and beverages, reducing salt intake, healthy Filipino and African American cooking, making healthy food choices, and donating meeting room space for support groups such as Over Eaters Anonymous.
- Advocate for the development and promotion of wellness policies in schools and in the workplace through collaboration and education.

Outcome: Provide health education and screenings at a minimum of 12 outreach events to the community.

Measurement: We will educate on the benefits of healthy behaviors and promote 1) exercise, 2) maintaining healthy weight, 3) eating 5 fruits and vegetables each day, and 4) not smoking. Through the health needs assessment process we should see a decrease in the percentage of

people that exhibit more than one risk factor for cardiovascular disease, diabetes, cancer and stroke.

4. Cancer:

Need: Declining benchmarks for early detection of cervical, colorectal and prostate cancer and other cancers.

Action A

- Promote healthy behaviors.
- Promote early detection screenings internally and at health events.
- Identify low cost screening opportunities through community collaborations
- Identify and develop additional cancer support groups as needed.

Outcome: People will adopt health lifestyles and access early detection screenings.

Measurement: Promote the range of support groups that meet at Seton Medical Center and collaborate with nationally recognized organizations with a community-based presence to promote early screenings and adopting healthy life-styles.

5. Healthy Births:

Need: Women from specific ethnic groups continue to receive inadequate prenatal care, which impacts unborn infants.

Action A:

- Elizabeth Ann Seton New Life Center will provide quality all-inclusive peri-natal services for low income, pregnant women with access to language services and cultural sensitivity. Services include pre-natal care and delivery, birthing and nutrition education and appropriate referrals to each mother during the entire pregnancy and 60 days post-partum. Increase outreach to the Asian Pacific Islander population about the importance of pre-natal care and the services of the New Life Center.

Outcome: Increase language capacity to include Mandarin, Cantonese and Arabic to increase the number of pregnant women accessing the New Life Center's Comprehensive Perinatal Service Program, which is recognized by the county.

Measurement: An increase in the number of pregnant women access the New Life Center's services and patients' satisfaction with the Center's services including care for those with gestational diabetes, provision of nutrition counseling, access to social services and other support.

Next Steps for Priorities

For each of the priorities listed above, Seton will continue to implement its plan and build support both internally and through collaboration with staff, physicians, community partners, the County and elected officials.

Priority Needs Not Being Addressed

With available resources, Seton Medical Center's Implementation plan attempts to address the top health priorities needs identified in the community health needs assessment. Seton also refers patients to other programs in the community addressing these identified needs. The community asset mapping identifies resources and services for other community health needs that the hospital is unable to provide. These priorities include the following:

Asthma & Respiratory: Not identified as one of the top five priorities by the hospital's community Advisory Committee. Seton Medical Center provides asthma and respiratory care to patients admitted to its hospital and will offer information to community resources to individuals requesting such referrals.

Substance Abuse: Seton provides referrals to community partners/programs addressing substance abuse.

- Alcoholic, Alanon, Alateen Recovery
- Asian American Recovery Services
- Catholic Charities
- El Centro de Libertad
- Pyramid Alternatives
- Sitike Counseling Center
- Pyramid Alternative
- Women's Recovery Association

Poor Oral Health: Seton refers individuals to community based programs such as Sonrisas and the County Health Department.

Violence: Seton does not provide services for violence prevention, but partners with community programs that provide counseling and address violence prevention:

- Community Overcoming Relationship Abuse: CORA
- ALICE: Filipino organization domestic violence prevention education
- Freedom House
- Rape Trauma Services
- Fatherhood Collaborative and Cleo Eulau Center
- Police Activities League
- Bay Area Legal Aide.

Infectious Diseases: Seton has an infection control program within the hospital and educates the community about hand hygiene during the flu season. Seton refers people seeking TB screenings to the County Health Department. Seton refers individuals for resources for to the County Health Clinic, Clinic by the Bay, and the Daly City Youth Health Center.

Families do not have enough food on a regular basis		2.7	2.3	2.4	2.1

Attachment B: KEY FINDINGS FOCUS GROUP RESULTS

Prioritization of Health Needs The prioritization process was explained to participants and observers. Each of the top health needs (including Cognitive Issues) would be ranked across four dimensions on a scale of 1 (no/low) to 3 (great/high). The dimensions, selected by the San Mateo County Healthy Community Collaborative, were:

- Clear disparities or inequities exist
- Presents a prevention/early intervention opportunity
- Impacts quality of life
- Is a priority

Each participant was given an electronic voting device. Their votes were averaged for each of the dimensions, and an overall average score was generated for each health need. The table below lists all of the health needs by their overall score, from greatest to least.

Health Need/ Condition	Overall Average Score	Scores of Prioritization Criteria Used			
		Disparities Exist	Prevention/ Intervention Opportunity	Quality of Life Impact	Community Priority
Diabetes	2.69	2.78	2.85	2.75	2.38
Obesity	2.60	2.58	2.85	2.62	2.36
Poor mental health,	2.59	2.45	2.31	2.91	2.69
Poor oral health	2.57	2.73	2.70	2.38	2.46
Cardiovascular disease, heart attack, stroke	2.56	2.67	2.75	2.83	2.00
Substance abuse (ATOD)	2.56	2.40	2.91	2.71	2.23
Violence*	2.56	2.54	2.50	2.82	2.38
Cancer	2.44	2.29	2.33	2.91	2.23
Births	2.42	2.21	2.60	2.73	2.14
Cognitive issues (Alzheimer's,	2.30	2.38	1.90	2.83	2.08
STDs/HIV-AIDS	2.29	2.17	2.82	2.38	1.80
Asthma & Respiratory Conditions	2.21	2.29	2.33	2.42	1.81
Infectious disease**	2.10	2.50	2.14	2.23	1.53

*Includes child abuse, domestic violence, elder abuse, gangs and bullying.

** Includes TB, Hepatitis B/C, pertussis, influenza, etc.
