Executive Director’s Report
MHSA Intern Stipend Program

Contract Overview
We are in Year 7 (2014–15) of our MHSA Stipend Program contract for Psychology Interns, which ends on June 30, 2016 (end of Year 8, 2015-16). This contract is funded by the Mental Health Services Act (California Prop 63) and managed by the Office of Statewide Health Planning and Development (OSHPD).

Over the past six years under this contract, CAPIC has distributed $4,121,185 in stipends to 218 clinical psychology students committed to working in the California public mental health system. Each full-time stipend is $20,772. The names of the CAPIC/MHSA stipend awardees for all six years are posted on the CAPIC website.

In 2014, CAPIC sought but was not awarded an extension to its current MHSA contract. As a result, our last issuance of stipends was on June 30, 2014. No more stipends are being awarded at this point, and at this point we are tracking the progress of the awarded stipend recipients.

Mental Health Services to the Public:
By the end of our current MHSA contract, the CAPIC/MHSA stipend recipients from contract years 1 – 6 will have completed their postdoctoral obligations. In doing so, and they will have given nearly 600,000 hours of public mental health service to Californians. This figure does not include subsequent and post-licensure hours, as many stipend recipients continue their careers in the public mental health system. See the chart below for additional details.

Diversity of Stipend Recipients:
CAPIC/MHSA stipend recipients are diverse, representing the clients and the communities they serve. 79% of stipend recipients are persons of color, speak a language other than English, have a rural upbringing and/or have immediate family with public mental health services usage.

See the attached MHSA poster (draft version, updated March 2015) for additional program details, including demographics on stipend recipients, breakdown of service by county, and new testimonials from stipend recipients.

Non-Stipend Programmatic Work

Online training modules
As part of this contract, CAPIC has also produced a series of online training modules on mental health issues following the Resiliency-Recovery theoretic approach to treating people with chronic mental health problems. These online training modules are free to the public and available to California licensed mental health professionals for Continuing Education (CE) credit. Because these online modules were created through State of California MHSA funding, CAPIC cannot charge for their use. There is a $15 administrative fee for processing CE credits, which are being managed in partnership with Alliant International University. If one is not seeking CE credits, there is no CE administration fee and no cost for using these online modules.

To-date, fifteen (15) online modules have been produced. These online modules are accessible from the CAPIC website: http://www.capic.net/online-training-modules/. A final module, titled “Motivational Interviewing” by Dr. Melodie Schaefer is in the final phase of being produced.

CAPIC has added the completion of these online training modules as an additional obligation by its stipend recipients as part of CAPIC’s MHSA Intern Stipend Program.

CAPIC/MHSA Mental Health Symposium:
On March 18-19, 2011, CAPIC held a 2-day symposium titled “Serving the Underserved: Preparing Psychologists for Effective Practice in the Public Sector” in San Jose, CA. The symposium was attended by clinical psychology educators from around the state, clinical psychology students, and representatives from psychology and public health organizations.

The symposium was structured so that participants were an active part of the experience and included the following five separate plenary sessions:
   Plenary I -- Basic Obligations to the Public
   Plenary II -- Evidence Based Practices
   Plenary III – MHSA grant projects
   Plenary IV – Psychology Education for the Future: Some Imperatives
   Plenary V -- Advocacy for Public Mental Health Service

More info on this symposium is available on the CAPIC website.
**CAPIC/MHSA Stipend Recipient Program Progress:**

**Program Obligations:**

- Stipend recipients must serve an internship at a publicly mental health-funded site, often a county behavioral/mental health division in order to be eligible for the stipend program.

- Stipend recipients must also complete one year of postdoctoral service at a publicly mental health-funded site.

- CAPIC stipend recipients must also complete all of the available online modules.

- These obligations must be completed within certain timeframes, the most relevant timeframe being the completion of all obligations by June 30, 2016.

- For those stipend recipients who do not complete these obligations within the given timeframes, CAPIC is required to seek the return of funds from, although some extensions are permissible. Any funds retrieved by CAPIC must then be returned to OSHPD.

**Program Progress:**

- All 218 stipend recipients have successfully completed their initial internship obligations.

- 148 stipend recipients (68%) have successfully completed all of the program obligations.

- 52 stipend recipients (24%) are in process of completing their program obligations (i.e. postdoc service and/or online module completion). CAPIC is working with them to ensure they complete their program obligations before the June 30, 2016 deadline.

- 12 stipend recipients (6%) have not completed their program obligations, and CAPIC has successfully retrieved their funds and returned these funds to OSHPD.

- 6 stipend recipients (3%) have not completed their program obligations, and CAPIC is currently seeking these funds back from these stipend recipients. Depending on their situation, CAPIC is working directly with them or with 3rd parties (e.g. a collection agency) to obtain these stipend funds back. Any retrieved funds will then be returned to OSHPD.
California Psychology Internship Council – CAPIC

The CAPIC/MHSA Stipend Program

CAPIC/MHSA Stipend Program Overview:
This stipend program is funded by the Mental Health Services Act (Prop 63).

This program awards stipends of up to $20,750 for Full-Time Equivalent (FTE) internships. Students in professional psychology programs who are serving doctoral internships in a publicly-supported mental health agency are invited to apply. To receive a Full-Time stipend the student agrees to work for one year (FTE) in a publicly funded mental health agency in California after graduation.

The intent of these funds is to increase the number of California psychologists committed to working with people served by the California public mental health system, and to increase the training of psychologists in the use of the Resiliency-Recovery approach endorsed by the CA/DMH. Two-thirds of the stipend recipients who have completed the stipend program continued working in public mental health afterwards.

An integral part of this program includes 15 online learning modules that have been developed to provide a wide range of knowledge to students in areas required for the provision of quality recovery/resiliency services. The CAPIC MHSA Symposium held in March 2011 also provided key leadership and networking opportunities for the student recipients, faculty and internship program professionals who participated.

California Psychology Internship Council (CAPIC):
CAPIC is an association of psychology doctoral academic programs and training sites (internship and postdoctoral) throughout the state of California. Its mission is to promote excellence in professional psychology training and mental health services. Among its many functions, CAPIC
- Helps facilitate agency quality assurance
- Runs an online internship match process for its member programs and students
- Provides standardized application processes and procedures for its academic, internship and postdoctoral program members.

I have had the privilege of continuing to work with underserved individuals at the Children's Center of Antelope Valley. At CCAV, work closely with DCFS and LADMH, where I specialize in treating children who are victims of trauma and providing comprehensive care to clients who have limited resources in their community. With the experience gained at CCAV, I have been accepted as an adjunct faculty member at The Chicago School of Professional Psychology, where I teach a course on the relationship between mental health and the law. Thank you CAPIC and MHSA for acknowledging the hard work of clinicians in California.

Michelle Garcia, Psy.D.
Registered Psychologist at The Children’s Center of Antelope Valley

The CAPIC/MHSA stipend has allowed me to devote 4 years serving culturally diverse and underserved clients in community mental health in Los Angeles County. I have been able to provide therapy and psychological testing to children, adolescents, and families as well as supporting parents on waivers to reduce mental health issues and return to work through the CalWORKS program. Additionally, I have provided ongoing supervision to early career psychologists and therapists working in community mental health focused on serving clients with hardships such as poverty, oppression, and immigration issues.

Kate Odom, Psy.D. Completed postdoc at Child and Family Guidance Center in Northridge, CA

California Psychology Internship Council – CAPIC
100 Ellinwood Way, Suite N275h, Pleasant Hill, CA 94523

Postdoc Service by County:
Years 1-5 (2008 - 2014)

- Alameda: 2%
- Contra Costa: 3%
- Los Angeles: 3%
- Marin: 3%
- Orange: 3%
- Sacramento: 2%
- San Bernardino: 6%
- San Diego: 6%
- San Francisco: 6%
- Santa Barbara: 2%
- Santa Clara: 3%
- Santa Cruz: 3%
- Sonoma: <1%
- Tulare: 1%
- Ventura 1%

Overall Diversity: 79% of recipients are persons of color, speak a language other than English, have a rural upbringing and/or have immediate family with public mental health services usage.

Over the six years (2008 - 2014) of this program, $4,183,435.00 has been awarded to 218 students.
This stipend program is funded by the Mental Health Services Act/Prop 63.

The following students were selected from a great number of applicants through a “blind” evaluation of their application materials. They have demonstrated the qualities of a clinical psychologist that are valued by CAPIC and by the California Department of Mental Health:

* Comprehensive Coursework in the basic field of Clinical Psychology
* Commitment to working with the underserved population of California
* Skilled in working with clients from the publically funded MH system
* Internship training in a publically funded mental health agency
* Reflect the diversity of the State of California
* Willing to work for a year following graduation in a publicly funded MH agency

**2008-2009 CAPIC MHSA Stipend Recipients:**

- Annalisa Almendras
  - ASPP/Argosy University-Bay Area
- Laura Bava
  - University of La Verne
- E. Joseph Becher
  - Antioch University-Santa Barbara

This concludes the list of Year 6 (2013-2014) as well as the totality of all Years’ Stipend Recipients.

This CAPIC MHSA program awards stipends of up to $20,750 for Full-Time Equivalent (FTE) internships. Students in professional psychology programs who are serving predoctoral internships in a publicly-supported mental health agency are invited to apply for them. To receive a Full-Time stipend the student agrees to work for one year (FTE) in a publicly funded mental health agency in California after graduation. A Half-Time stipend provides a student with half the FTE stipend amount and requires a commensurate half-year postdoctoral payback service. These stipends are in addition to whatever compensation the agency may provide.

The intent of these funds is to increase the number of California psychologists committed to working with people served by the California public mental health system, and to increase the training of psychologists in the use of the Resiliency-Recovery approach endorsed by the California Department of Mental Health (CA/DMH).

An integral part of this program includes 15 online learning modules that have been developed to provide a wide range of knowledge to students in areas required for the provision of quality recovery/resiliency services.

The CAPIC MHSA Symposium held in March 2011 was also funded by this stipend program. This symposium provided key leadership and networking opportunities for the student recipients, faculty and internship program professionals who participated.

More information on these aspects of the CAPIC MHSA Stipend Program is available on the CAPIC website at www.CAPIC.net or from the CAPIC office staff.

UPDATE (December 2014):

In 2014, CAPIC sought but was not awarded an extension to its current MHSA contract. As a result, our last issuance of stipends was on June 30, 2014. No more stipends are being awarded at this point, and at this point we are tracking the progress of the awarded stipend recipients.

A new MHSA contract for issuing stipends for psychology interns has been awarded to Alliant International University (AIU). Inquiries regarding future MHSA stipends should be directed to AIU.
