What do we hope to accomplish today?
Project Overview
We are a non-profit research organization within the UC San Diego School of Medicine, Department of Family Medicine and Public Health. Our mission is to support research focused on understanding how clinical and treatment services affect health outcomes. The UCSD HSRC research team specializes in the measurement, collection and analysis of physical and mental health outcomes data to help improve health care delivery systems and, ultimately, to improve patient and client quality of life.

H+Co works with public sector, nonprofit, and philanthropic clients nationwide to reveal new insights about the nature and impact of their work. Through high-quality, culturally-based evaluation, planning, and consulting services, we help organizations across a wide range of social impact areas to translate data into meaningful action. We are skilled in responding to diverse information needs with technical rigor and approaches that are both flexible and inclusive.

CFP/C Surveys
Provide Feedback
CFP/C Workforce Survey

Survey introduction:

- How do we help potential respondents identify whether they are the right person to complete this survey?
- What are the most important things to communicate about the value of the survey and how the data will be used?

Does the survey:

- Use correct terms and accessible language?
- Take too long to complete for this target group?
- Consistent with other data collection efforts around workforce issues?
- Omit important questions or topics?
