Postbaccalaureate Programs:

Postbaccalaureate programs, offered at various colleges and universities, provide students the opportunity to increase their chances for entry into medical, dental, or other health professional schools. Programs usually consist of intensive introductory courses in math and the basic sciences to improve student knowledge in those areas and to prepare the student for graduate work.

One- to two-years long, many programs are tailored to the needs of each student. Some are geared toward assisting non-science majors or assisting other students in completing courses required for admission to a health professional school. Others stress Medical College Admission Test (MCAT) preparation. Program descriptions, as listed below, are received from the sponsoring schools. For more information about eligibility requirements and costs, contact the school directly.

California State University, Dominguez Hills

Postbaccalaureate Program

Description: For students who need to complete premedical undergraduate science courses in preparation for application to professional schools.

Eligibility: Students with a BS/BA and above a 2.5 GPA.

Duration: One to three years.

Deadline: June 1 for fall admission

Contact: (310) 243-3388, (310) 243-3376 e-mail: Jlyle@DHVX20.csudh.edu James Lyle Department of Chemistry CSU, Dominguez Hills Carson, CA 90747

California State University, Fullerton

Health Professions Postbaccalaureate Advising

Description: Offers premedical and prehealth professions prerequisites plus additional science courses. Research experience available on campus; mock interviews; evaluation of MCAT or DAT scores. No degree or certificate given, and no alliance with any specific medical school. Evaluation process conducted.

Eligibility: Enrolled at CSUF.

Duration: Contingent upon courses needed. No formal program.

Deadline: Rolling admissions

Contact: (714) 278-3980 David B. Drath, PhD CSU, Fullerton c/o Health Professions Office LH203 800 N. State College Blvd. Fullerton, CA 92834

California State University, Hayward

Postbaccalaureate Program

Description: A postbaccalaureate program for students interested in the health professions. Program contents and duration dependent on student’s background and needs.

Eligibility: Open to all students.

Duration: 1 ½-2 years.

Deadline: None, apply within the University.

Contact: (510) 885-2741 Dr. Julia Dragolovich CSU, Hayward Department of Biological Sciences Hayward, CA 94542

2001 Postbaccalaureate and Summer Enrichment Programs:

Look at the many opportunities for you!

Are you currently enrolled in or looking for a program to help prepare you for a career in health services? Do you struggle with economic or educational barriers? Are you looking for a way to supplement your education in hopes of increasing your chances of getting accepted to graduate school? Or did you drop out of school and still desire a health services degree? Well, Health Pathways has worked with numerous Universities and colleges to compile the new Postbaccalaureate/Summer Enrichment issue, which contains special programs from all over the country just for you.

Postbaccalaureate Programs...

Postbaccalaureate programs, offered at various colleges and universities, provide students the opportunity to increase their chances for entry into medical, dental, or other health professional schools. Programs usually consist of intensive introductory courses in math and the basic sciences to improve student knowledge in those areas and to prepare the student for graduate work.

One- to two-years long, many programs are tailored to the needs of each student. Some are geared toward assisting non-science majors or assisting other students in completing courses required for admission to a health professional school. Others stress Medical College Admission Test (MCAT) preparation. Program descriptions, as listed below, are received from the sponsoring schools. For more information about eligibility requirements and costs, contact the school directly.
Loyola Marymount University
Postbaccalaureate Program
Description: Open to students who lack basic prerequisites to premedical requirements. Most undergraduate courses are offered in the daytime only, on a space-available basis. Students have to apply through admissions as a non-degree student and may take a maximum of 18 semester hours. It is not an organized program.
Eligibility: Students with a bachelor's degree and a minimum 3.4 GPA.
Duration: Regular semester.
Deadline: Apply within University Contact:
Dr. Anthony P. Smulders, Director
Health Professions Information Program
Loyola Marymount University
7900 Loyola Blvd.
Los Angeles, CA 90045-8220

Mills College
Postbaccalaureate Premedical Program
Description: General biology, general chemistry, calculus, organic chemistry, and physics. Other courses optional. Federal loans (Stafford and SLS) and a limited number of assistantships awarded to second year students. On-campus excellent success rate, individual attention from faculty.
Eligibility: Non-science baccalaureate degree from an accredited college or university. Generally, applicants have at least a 3.2 GPA overall. Students may not retake any previously taken science courses. Three letters of recommendation, essay, official transcripts confirming baccalaureate degree, and official GRE general test, SAT, or ACT scores required.
Duration: One to two years.
Deadline: February 1, 2001
Contact: (510) 430-3309
fax: (510) 430-2159
e-mail: Grad-studies@mills.edu

Oakland, CA 94613

San Jose State University
Biological Sciences
Description: Actively encourages students who are changing career directions to enroll as undergraduates — second bachelor's degree, via standard university admissions procedures. Special advising is provided, including intense personalized assistance in satisfying premedical requirements. Fees are approximately $1,000 per semester.
Eligibility: Contact the school.
Duration: Those with technical backgrounds (e.g. engineers) prepare for the MCAT in one year, while those without college chemistry take two years to prepare for the MCAT.
Deadline: Inquire within the University.

Scripps College
Postbaccalaureate Premedical Program
Description: Program provides individuals with the opportunity to pursue a career in health care by offering an intensive curriculum of premedical courses. The small program admits 10-14 students per year and currently has an acceptance rate to medical and veterinary school of 91%. Also has two medical school linkage programs (Temple University in Philadelphia, Pennsylvania, and Western University of Health Sciences, College of Osteopathic Medicine in Pomona, California) which allows students early admission to these medical schools. The early decision programs are limited and are only made available to students with superior qualifications.
Eligibility: Available to both women and men who have a bachelor's degree in a non-science area with a 3.0 GPA or above; applicants must have taken either an SAT, ACT, or a GRE exam and official scores are required for each applicant. Should possess a strong motivation toward a career in health care as evidenced by volunteer or paid work experience in a health care or social service setting.
Duration: 12-15 months.
Deadline: March 1, 2001

University of California, Los Angeles
School of Medicine
Re-applicant Program (UCLA RAP)
Description: A comprehensive, structured postbaccalaureate program to assist students from disadvantaged backgrounds who have been unsuccessful in gaining admission to any U.S. medical school. An intensive eight-week summer session, focuses on MCAT preparation. Distinguished guest lecturers provide seminars and workshops covering academic skills; extensive reviews of biology, chemistry and physics; self-development; time management; financial planning; medical school re-application, and interviewing skills. An individualized academic-year program that consists of a science curriculum follows. Participants, in close consult with program advisors, select courses through UCLA Extension or a local California State University.
Eligibility: Students must have applied to a University of California medical school and have been previously unsuccessful in gaining admission to any United States medical school, be considered disadvantaged or from an underserved community, have completed an undergraduate degree or higher from an accredited United States college or university, be a U.S. citizen or permanent resident, have a minimum GPA of 2.7 or higher, and have a minimum combined MCAT score of 15. A two- to three-page statement of intent addressing your present academic situation, the nature of your disadvantaged or underserved status, your expectations, your assessment on why you did not gain medical school admission, areas you would like to improve, and your future career aspirations. Although not required, preference will be granted to legal residents of California.
Contact: (310) 825-3575 www.medstudent.ucla.edu/osss Elizabeth Guerrero, MPH Director, UCLA RAP Office of Student Support Services 13-154 CHS Box 956990 UCLA School of Medicine Los Angeles, CA 90095-6990

University of California, Davis
Postbaccalaureate Re-applicant Program
Description: Stress fundamental studying/testing skills during summer component; followed by three-quarters of rigorous upper-division science courses individually selected for postbaccalaureate students. All living and academic costs are covered during summer component; it is the student’s responsibility to make arrangements for financial aid for the academic school year through the Undergraduate Financial Aid Office at UC Davis.
Eligibility: Be considered a socioeconomically disadvantaged student and/or show evidence of returning to medically underserved community; completion of an undergraduate degree (or higher) from an accredited American college or university; must be a legal resident of California; prior rejection (via AMCAS application) from an AAMC affiliated medical school; prefer minimum MCAT average of 6.0. Some requirements may be waived depending on individual circumstance.
Duration: Entering summer (nine weeks) plus three academic quarters total of one year.
Deadline: April 30, 2001 (Inquire for applications in November 2000)

Re-applicant Summer Course (RSC)
Phase I Postbaccalaureate program
Description: Students also participate in full component, enrolling in UCSD science courses. Extensive mock interviews videotaped with UCSD School of Medicine Admissions Committee members, intensive MCAT preparation, counseling, reapplicant strategies, and learning skills specialists. Special health-issues workshops. Stripend and housing for eight weeks.

Eligibility (for RSC and Postbac): Educationally/economically disadvantaged student; California resident and U.S. citizen or permanent resident. Bachelor’s degree; already applied to medical school and received interview; taken MCAT; completed one year chemistry, organic chemistry, physics, biology, and math; minimum 2.7 science GPA; and proven commitment to serve health care needs of underserved communities.
Duration: Eight weeks.
Deadline: June 1, 2001

Phase II Postbaccalaureate Program
Description: Extension of Reapplicant Summer Course, enrollment at UCSD for academic year is Phase II of the Postbaccalaureate Program. Undergraduate science courses (primarily upperdivision) to strengthen science profile. Course tutoring, and reading and writing skills specialists available. Clinical skills. Opportunity to participate in research projects and volunteer clinics. Special workshops and counseling. Participants must secure own housing. The student will be required to reside in San Diego for program duration.
Duration: Nine months.

Armstrong Atlantic State College
Postbaccalaureate Program
Description: Allows students many options to meet their needs and interests. Students may take undergraduate courses to complete premedical requirements, review course materials as preparation for the Medical College Admission Test (MCAT), complete a second undergraduate degree, or for general interest. Students may engage in medical internships and/or do volunteer work to gain experience in medical fields. One option will allow qualified students to take graduate courses with the possibility of working toward a master’s degree in Public Health or Health Care Administration. Standard Financial aid is available.
Eligibility: Students who lack prerequisites basic to medicine.
Duration: Depends on the needs and interests of the individual student.
Deadline: Students may apply at any time consistent with the university application procedures and start at the beginning of any semester.

Duquesne University
Postbaccalaureate Premedical Program

Description: Designed for both students with a non-science background (career changers) and those with a science background (enhancement program). The curriculum is individually designed based upon the student’s academic background. Linkage agreements exist with Temple University School of Medicine, and the Lake Erie College of Osteopathic Medicine. The linkage agreements allow students to matriculate into medical school a year earlier than normal by omitting the “glide year.”

Eligibility: Minimum 3.0 GPA; 1100 SAT score, or 26 ACT score; two faculty letters of recommendation; personal statement; and interview at Duquesne University.

Duration: One to two years, based on student’s academic history and performance within the program.

Deadline: October 15, 2000 for Spring admission; May 30, 2001 for Fall.

The Health Careers Training Program (HCTP), in conjunction with several key partners, is currently focusing on projects involving Psychiatric Technicians, Community Health Workers, and Certified Nurse Assistants. HCTP is working closely with the Community Colleges’ Regional Health Occupation Resource Centers (RHORC) who share a common goal of addressing the current and future training and employment needs of California’s health care industry.

The most current projects being addressed by the HCTP and RHORC are:

Psychiatric Technicians – HCTP is currently working with Department of Developmental Services (DDS), Department of Mental Health (DMH) and the Department of Corrections to fill over 3,600 Psychiatric Technician job openings from now until the Year 2003. HCTP will be assisting DDS and DMH with the necessary training and recruitment efforts needed to fill these civil service positions throughout the State of California.

Community Health Workers – Community Health Workers (CHW) act as a bridge between communities and the health and social service systems. California is the most diverse state in the nation, with 120 language groups in the city of Los Angeles alone. CHW’s bridge the culture and language gap to connect diverse communities with health services.

Certified Nurse Assistants – According to the California Association of Health Facilities (CAHF), California’s long-term care facilities will need a total of 108,000 new direct caregivers between now and January 2003. CAHF estimates that 90 percent of these jobs will be for certified Nurses Assistants (CNA).

Partners of HCTP who assist with the training and placement for the allied health care jobs, and contribute to the economic aspect of the projects are:

California Department of Community Services and Development (CSD) – CSD works closely with various state agencies to help develop and implement California’s Welfare-to-Work Program, CalWORKS, and the Workforce Investment Act through Community Services Block Grants (CSBG) contributions. Stabilizing low-income individuals and families through CSD’s contribution is a critical first step in transitioning low-income communities towards self-sufficiency.

One-Stop – Joint service centers established by employment training and social services agencies to increase the ease of use and efficient delivery of assistance programs.

CalWORKS – Job training program managed by the California Department of Social Services, and administered by County Welfare Directors.

Employment Development Department (EDD) – California agency responsible for workforce training and unemployment programs.

(See Projects, on page 10)
As part of the Health Careers Training Program’s attempt to provide you with information regarding allied health occupations, each issue will focus on at least one allied health profession and will include specific information regarding: job duties, working conditions, employment trends, salaries, entrance requirements, and advancement opportunities.

Dental Assistants

THE JOB

DENTAL ASSISTANTS are part of a tooth care team that includes dentists, dental hygienists, and other assistants. Dental Assistants get patients ready for an examination or treatment and make sure that patients are relaxed and comfortable. They check to see that all supplies, instruments, and equipment are ready. They help the dentist at the chairside by mixing compounds for fillings, handling a suction tool to keep the patient’s mouth clear, and handing instruments to the dentist. Technical duties include instrument and room sterilization and inventory and care of equipment. Assistants may do lab work and teach patients about dental hygiene. Assistants who are certified in radiation safety can take dental X-rays.

Dental Assistants take impressions of teeth for diagnosis, remove stitches and dressings, and give fluoride treatments when working with the dentist.

Assistants may also do clerical duties such as making appointments, keeping case records, handling billing and payment, and handling patient dental insurance.

WORKING CONDITIONS

Dental Assistants work in medical offices. The examination room is quiet, brightly lit, and fairly comfortable if the assistant is sitting. Assistants may have to stand while helping the dentist at the chair, but modern methods now make it possible to do many chairside duties while seated.

A Dental Assistant’s job is often stressful due to the nature of the work. Sometimes a patient’s treatment can be painful, so Assistants must be able to comfort and calm down worried and frightened patients.

Assistants have to be careful to protect patients and themselves from infection. Assistants must wear safety eye glasses, rubber gloves, and masks over their mouths while working chairside.

EMPLOYMENT OUTLOOK

The Dental Assistant is one of California’s top fifty fastest growth occupations.

The California Projections of Employment, published by the Labor Market Information Division of the Employment Development Department, estimates that the number of Dental Assistants in California will reach 39,050 by 2005, an increase in new jobs of 12,190 over the number there was in 1993.

There will also be an estimated 11,350 job openings due to people retiring or leaving the occupation. Added to the 12,190 new jobs expected, this makes for an estimated total of 23,540 job opportunities through 2005.

(These figures do not include self-employment nor openings due to turnover.)

ENTRANCE REQUIREMENTS AND TRAINING

Employers prefer applicants who have completed a Dental Assistant training program. Training can be gotten through community colleges and public and private adult vocational schools. Many high schools give this training through their Regional Occupational Program (ROP). The California Dental Assistants Association recommends a one or two year program approved by the Council on Dental Education of the American Dental Association.
The California Board of Dental Examiners tests and certifies Registered Dental Assistants (RDAs). RDA applicants must have graduated from an approved educational training program or done satisfactory work as a dental assistant for eighteen months and must pass the RDA written and performance test. RDAs must meet continuing educational requirements for renewal of their certification every two years.

Dental Assistant schools are responsible for radiation safety training; they also do the certifications needed for assistants to legally take dental X-rays.

Results from surveyed dentists show that certain skills are necessary for Dental Assistants. These skills include knowledge of dental materials and procedures, recordkeeping, spoken and written communications skills, friendliness, and willingness to work closely with other dental team members. Dentists prefer to hire applicants who are eager to learn and show willingness to adapt to busy and fast work.

WAGES, HOURS, AND FRINGE BENEFITS

There is a very wide range in Dental Assistant wages, depending on education, experience, job duties and responsibilities, and location. Wages for beginners are between minimum wage and $13.00 per hour. Assistants with some experience get $6.00 to $21.00 hourly. Assistants with three years or more with the same firm can earn from $7.00 to $23.00 per hour. RDAs usually get the highest wages.

Most Dental Assistants work day time hours and at least 36 hours a week. An estimated one in five hold part time jobs.

Almost all dentists offer paid health insurance, and many also pay for dental insurance. Paid vacation and sick leave are benefits that almost all assistants can expect. Retirement plans and life insurance are provided by some employers.

FINDING THE JOB

Dental Assistant jobs are found through dental assistant school placement services, personal references, applying to dental offices, and ads in newspapers. Applicants should also register with the California Employment Development Department.

How HCTP is Unique

The Health Careers Training Program (HCTP), under the Office of Statewide Health Planning and Development (OSHPD) umbrella and within the Primary Care Resources and Community Development Division, is unique in its singular “industry focused” health workforce development program in the State of California Health and Human Services Agency.

The HCTP is flexible and uses an “open” approach in meeting new partners and including them in projects. Staff invites established partners as well as any new partners that have the potential to enhance the collaborative and contribute to employer needs.

HCTP staff researches an array of data, information, and statistics published by other state agencies, as well as legislation impacting business and industry, communities, and health care services. HCTP networks with all appropriate stakeholders, identifies funding, and brings all interested stakeholders together to establish a collaborative partnership. HCTP seeks to involve all partners’ expertise to identify, recruit, train, and place individuals in allied health care industry jobs pre-identified by the HCTP staff.

Southern Illinois University
Carbondale (SIUC)
Medical/Dental Education
Preparatory Program (MEDPREP)
Description: Assistance in admission
to and preparing for medical/dental
school; MCAT prep; enrichment in
biology, chemistry, physics, math,
reasoning in reading and writing, study
skills; counseling. MEDPREP advisor
helps develop academic plan tailored to
needs, including university and
MEDPREP courses. Course credits; no
degree given. Tuition rates as for
SIUC; some tuition scholarships.
Standard financial aid process
(loans). No application fee for
program.
Eligibility: 2.0 total GPA, 2.0
math/science GPA; U.S. citizen
or permanent resident. All
HCOP program participants must be
from an educationally or economically
disadvantaged background.
Duration: Two years (individualized).
Deadline: February 1, 2001 for June
2001 entry.

Townson University
Postbaccalaureate Premedical
Program
Description: Not remedial. For the
outstanding preprofessional who has
not submitted an application to
medical/dental school or taken MCAT,
DAT. Science courses for admission to
U.S. medical, dental schools. Small
classes, labs. Flexible curriculum.
Eligibility: Non-science or science
major; did not take courses for
admission to preprofessional school;
accredited bachelor’s degree; preparing
for admission to professional school;
for medical school, minimum
undergraduate 3.4 GPA; dental,
minimum 3.0 GPA.
Duration: One year. Additional
semesters optional.
Deadline: Rolling admissions. Final
deadline is March 1, 2001.

Year 2001
Summer Enrichment Programs

Summer Enrichment programs, offered through various organizations, colleges, and universities, provide students the opportunity to increase their chances for entry into medical, dental, or other health professional schools. Such programs may include introductory courses in math and the basic sciences to improve student knowledge in those areas needed to prepare the student for graduate work; scientific problem solving, and analytical skills development and test-taking strategies for standardized tests like the Medical College Admission Test; clinical preceptorships; and to do research in labs with experienced scientists. For more information regarding eligibility requirements, contact the school directly.

California Programs

American Heart Association, Burlingame
Student Research Program
Description: Cardiovascular research in California labs with experienced scientists. $4,000 stipend. No college credits.
Eligibility: Full-time California, Nevada, Utah college or university student or state resident. Junior or senior status in Fall 2001 or students who graduate in December 2001 or later. Students must have completed a total of at least four semesters or six quarters of biology, physics, chemistry, and one quarter of calculus, statistics, computational methods or computer science. Transcripts and two letters of recommendation.
Duration: Ten weeks.
Deadline: January 16, 2001 (request application by December 15, 2000)
Contact: (650) 259-6700

Marquette University
School of Dentistry/Physical Therapy Program
Summer Science Enrichment Program
Description: The Health Careers Opportunity Program (HCOP) offers three summer programs. The Summer Science Enrichment Program I (SSEP I) for high school students interested in physical therapy; the Summer Science Enrichment Program II (SSEP II) for college students interested in dentistry and physical therapy; and the Pre-Enrollment Support Program (PESP) for the incoming dental students and graduate physical therapy students. All of these programs offer students courses in dental science, physical therapy, biology, chemistry, ACT/SAT review (SSEP I), and DAT review (for dental SSEP II students) as well as the opportunity to interact with students and practitioners in dentistry and physical therapy. Housing and transportation to and from Marquette University are provided at no cost to the student.
Eligibility: All students must be financially or educationally disadvantaged.
SSEP I: Must be a rising high school senior with a minimum GPA of 2.75 and have completed two classes of biology and/or chemistry.
SSEP II: All students must be returning to undergraduate school in the fall.
Physical Therapy: Non-Marquette University Students must have a minimum 3.0 GPA and be rising undergraduate seniors with one semester of biology, two semesters of chemistry and physics, two semesters of English and literature (fiction, poetry, etc.), two semesters of history, one semester of psychology, statistics and sociology or anthropology.
Dental: Must be rising undergraduate sophomore, junior and senior with a minimum GPA of 2.5 and have completed two semesters of biology and chemistry.
PESP: Physical Therapy: Students must apply to physical therapy graduate program.
Dental: Students must be accepted to Marquette University School of Dentistry.

Medical College of Georgia Student Educational Enrichment Program

Description: All students will study a biomedical science course for four hours credit; attend a learning skills seminar; and take courses in MCAT review, analytical reading, and medical writing. Each student receives a biweekly stipend for living expenses and the program pays tuition and campus housing fees. Upon successful completion of the program, the student will receive an additional stipend. There is no travel allowance.

Eligibility: Designed for two levels of college students who are interested in the health professions. Students in the intermediate group should have finished their freshman or sophomore year. Those in the advanced group should have finished their junior or senior year and be planning to apply to medical, dental, or graduate school or an allied health program. Preference given to Georgia residents.

Duration: Seven weeks during the months of June and July 2001.
