

SB 1661 Facility Report #2
12268 – Scripps Mercy Hospital – Chula Vista
Report Comments for Building 02/02A:

Scripps is pursuing, through available means, additional assessment of this and other buildings currently classified as SPC-1. Reconsideration for classification as SPC-2 is based on recent favorable information, such as the results from the material testing and assessment of incidental modifications. Scripps' goal is to meet the stipulated SB 1953/SB 1661 deadlines to the extent that current and future economic conditions allow access to needed capital.
