

The *California Student/Resident Experiences and Rotations in Community Health* (Cal-SEARCH) program is a partnership between the Office of Statewide Health Planning and Development (OSHPD), the California Area Health Education Center (AHEC), and the California Primary Care Association (CPCA). This program is funded by U.S. Department of Health and Human Services, Health Resources and Services Administration.

## Cal-SEARCH Community Project

Participants in the Cal-SEARCH program will address a local population health concern through a community project. Students and residents will work with their Mentor to develop and implement the community project and must complete a report once the project is complete. The report must be signed by the Mentor. A copy of the report form and additional report requirements is included in the Student Acceptance Packet. Here are some past community project examples from other Cal-SEARCH participants.

### ***Community Project Examples***

California Healthy Nail Salon Collaborative  
Cardiovascular Patient Education Curriculum  
Dental Awareness Brochures  
Diabetes Comprehension and Management Survey  
Diabetes Intervention for Low-Literacy Patients
