# State Utilization Data File of Long-term Care Facilities 2006

## Introduction

The Office of Statewide Health Planning and Development (OSHPD) annually produces the State Utilization Data File of Long-term Care Facilities. The data comes from the individual *Annual Utilization Report of Long-term Care Facilities* that are filed by California's licensed long-term care facilities for the previous calendar year. The data are "as reported" by each facility after complying with input quality control edits. The long-term care utilization data file includes additional data fields populated by information derived from licenses issued by the California Department of Health Services (DHS). Due to occasional time lags between licensing activities, and subsequent updates to the OSHPD's Licensed Facility Information System (LFIS), some fields that are based on licensing data may not provide the most current information (Visit the OSHPD website regarding LFIS: <http://alirts.oshpd.ca.gov/LFIS/LFISHome.aspx> A login is not required for general use).

OSHPD welcomes suggestions for improving our data products. Email your suggestions to [hircweb@oshpd.ca.gov](mailto:hircweb@oshpd.ca.gov)

## Online Reporting System: ALIRTS

Facilities submit their annual utilization data to OSHPD through the secure web-based reporting system known as ALIRTS (Automated Licensing Information and Report Tracking System). Once the data are submitted and meet the ALIRTS input quality criteria, the data are accepted and immediately become available to the public via the Internet (<http://alirts.oshpd.state.ca.us>). In addition to the data reported by each licensed facility, ALIRTS also has current and historical facility licensing information. The ALIRTS perspective for both utilization data and licensing data is by individual licensed facility. The reporting deadline is March 15 of each year.

## Statewide Data Availability: State Utilization Data File of Long-term Care Facilities

**Initial Data Extract.** OSHPD customarily creates this preliminary data extract and summary from facilities whose report successfully passed the automated edits. While these Reports satisfied the initial automated review requirements, users should be aware that these submitted individual reports and accordingly, statewide utilization amounts, are preliminary. The initial data extract was generated in May 2007. It is posted on the OSHPD webpage for the public to access, view, and download.

**Final Audited Data Extract.** A more rigorous review of submitted report data is conducted during the summer months. OSHPD staff identify potential errors and year-to-year inconsistencies in flagged facility Reports. Facility report preparers and administrators are contacted and asked to confirm or revise reported data as needed. The final data extract is the data product that results from the desk-audit stage and is available early in the Fall. Once the final audited data extract is released and posted on the webpage, the initial preliminary extract is removed.

## Data File Format

New and long-time users of the public data file will notice some small changes that were recently incorporated for ease of use. For example, rather than displaying the data in a comma-delimited text file, the data file is now configured as a MS Excel file. The Excel software

## State Utilization Data File of Long-term Care Facilities 2006

application uses “sections” or “tabs” called **worksheets**. This more efficient file management system permits the display of all the data in addition to any explanatory notes that help the user better understand the data. The data file is contained in four of the five worksheets. In the data worksheets, each row (line) displays all the data from one facility, while each column displays the values for one data field (sequentially, by row and column, from the report form).

Excel was selected because it is the analytical software used by most long-term facility utilization data users. Its file format has become as generic as text file format. Excel was also selected because it can handle multiple worksheets in one file. A note for those data users who do not have Excel: Most analytical software can import Excel worksheets. If the Excel file format is incompatible with your software, contact OSHPD ([hirc@oshpd.ca.gov](mailto:hirc@oshpd.ca.gov)) to obtain individual, comma-delimited text data files.

### More on the Use of the MS-Excel Worksheets

There are five worksheets in the State Utilization Data File of Long-term Care Facilities. To navigate from one worksheet to another, click on the applicable tab at the bottom of your screen. (See a recent year example in Figure 1, below):

849	206370776	BRIGHTON PLACE - SPRING VALLEY	206370776	'9009 CAMPO ROAD	*
850	206370778	GRANITE HILLS CONVALESCENT HOSPITAL	206370778	'1340 EAST MADISON AVENUE	*

### Description of the Worksheets in the Data File

**Tips:** This worksheet provides suggestions for more effectively using the data file and general notes pertinent to the facilities reporting data.

#### **Sections 1–4 worksheet**

This worksheet reflects the first four sections of the *Annual Utilization Report of Long-term Care Facilities* report form and the data received from facilities that filed (responders). The Office includes an accompanying worksheet entitled, "**Non-Resp1-4**" that contains some licensure data from facilities that failed to file their Report. These facilities are referred to as Nonresponders. Please note that some or most fields in the latter worksheet may contain little or no data but are included in the Data File to help users who work extensively with Excel's cut, paste, and import/export functions.

- **Section 1** includes basic facility descriptors, e.g., name and address.

## State Utilization Data File of Long-term Care Facilities 2006

- **Section 2** includes license type and licensee (owner of license) description.
- **Section 3** provides patient census and utilization.
- **Section 4** provides patient demographics.

### Section 5 Worksheet

This worksheet reflects the last section of the *Annual Utilization Report of Long-term Care Facilities* report form and the data received from facilities that filed (responders). The Office includes an accompanying worksheet entitled, "**Non-Resp 5**" that contains some licensure data from facilities that failed to file their Report. These facilities are referred to as Nonresponders. Please note that some or most fields in the latter worksheet may contain little or no data but are included in the Data File to help users who work extensively with Excel's cut, paste, and import/export functions.

- **Section 5** provides data on Major Equipment and Capital Expenditures.

The worksheets' default (original) sequence order: The first two columns of the worksheets display the facility's name and OSHPD\_ID number. The worksheet lists the facilities in numeric order by OSHPD\_ID number (Column A). (Because the county code is in the third and fourth digits, the facilities are also in county order when sorted in numeric order).

### **Significant Data Field Changes in the State Utilization Data File**

For 2006, there was one name change to a data field as follows:

Section 3 - Patients Admitted From and Discharged to

- Line 17 - Added "AMA" Against Medical Advice to "AWOL" for discharge
- New fields for displaying **future data items** are included in this dataset. Some of these fields remain unpopulated for 2006 but are slated to be filled in future datasets. Users should note that these items are not data reported by the facility itself or provided by the Licensing and Certification Division of DHS. These fields are located between the License Status and County fields.

### **Traditional and Alternative Header Rows**

Header rows provide names for each data field (column). Three alternative header rows are included for the data worksheet (see Figure 2 sample below, copied from a related data file). The first row is the English abbreviation of the data field. The second is the section, line and column reference that can be sorted. The third header row refers to the section, line and column on the Annual Utilization Report and is a more "visual" format. These are simply alternatives for your use. You have the option to use the one (or ones) you like and can delete the others.

Figure 2

The Office recognizes that users of the data have varying preferences regarding header rows. Three header row styles are offered here. For those who prefer English names, the first alternative header row displays English abbreviations.

The **Section+Line+Column** format (row 2) is the next alternative header style. It contains alpha characters and does not include periods. Each field name in this set begins with the letters “slc”, followed by 2-digit **section**, 2-digit **line** and 2-digit **column** numbers. For example, the field that is related to the question, “Was this facility in operation at any time during year?” (**Section 1, Line 9, Column 1**), would be field name “slc010901.”

If the data in the LTC utilization data worksheet are intended to be imported into other analytical (database) software, be aware that some database applications require at least one alpha character in the field name, while others will not allow “periods.” The alternative field names in the two first rows both meet these naming conventions.

The traditional header approach has been to provide field names that display the report form coordinates. The row directly above the data rows (in both data worksheets) is such a header row. Most field titles in this row (including all facility reported data fields), display their respective report form coordinates from the ALIRTS *Annual Utilization Report of Long-term Care Facilities* report form. The field names display the **Section+Line+Column** numbers, delimited by “dots” (periods). Thus, using the prior example “Was this facility in operation at any time during year?” is reported in Section 1, Line 9, Column 1. This field appears in spreadsheet Column I in the “Sections 1 - 5” worksheet and is displayed as “1.9.1”. This report-form-coordinates format is less complex for display purposes but does require the data user to refer to a copy of the report form when using the data file. A copy of the blank reporting form is provided as Appendix A, located at the end of this documentation file. Printing a hard copy for reference is recommended.

18	Death		
20	Total		

\* Include RCFE, ARF, Other Assisted Living Facilities, or a secured facility such as an Alzheimer's unit, jail or prison.

**PATIENTS BY PAYMENT SOURCE ON DECEMBER 31**

Number of patients in the facility on December 31, whose principal source of payment was from the sources shown.

Line No.		(1) Patients
21	Medicare	
22	Medi-Cal	
23	Managed Care*	
24	Private Insurance	
25	Self-Pay	
29	All Other	
30	Total	

\* Include patients enrolled in Medicare and Medi-Cal managed care health plans.

**CENSUS INFORMATION**

**Section 3 (con't)**

OSHPD FACILITY ID No. \_\_\_\_\_

**DISCHARGES by LENGTH OF STAY**

Number of discharges for each of the ranges of length of stay below.

Line No.	Time in Facility	(1) Patients
31	Less than 2 weeks	
32	2 weeks to less than 1 month	
33	1 month to less than 3 months	
34	3 months to less than 7 months	
35	7 months to less than 1 year	
36	1 year to less than 2 years	
37	2 years to less than 3 years	
38	3 years to less than 5 years	
39	5 years to less than 7 years	
40	7 years to less than 10 years	
41	10 years or longer	
45	Total	

**HOSPICE PROGRAM**

Line No.		(1)
51	Did your facility offer a hospice program during the report period?	Yes <input type="checkbox"/> No <input type="checkbox"/>

**SPECIAL PROGRAMS**

Line No.		(1) Patients
52	Number of patients diagnosed as having AIDS, ARC, prodromal AIDS or HIV-related diseases and illness (HTLV-III / LAV).	

Line No.		(1)
53	Does your facility offer a specialized program for Alzheimer's patients?	Yes <input type="checkbox"/> No <input type="checkbox"/>

Line No.		(1) Patients
54	Number of patients who had a primary or secondary diagnosis of Alzheimer's Disease.	

**PATIENT DEMOGRAPHICS**

**Section 4**

OSHPD FACILITY ID No. \_\_\_\_\_

**MALES - RACE AND AGE OF MALE LTC PATIENTS ON DECEMBER 31**

Line No.	Race	(1) < 45	(2) 45-54	(3) 55-64	(4) 65-74	(5) 75-84	(6) 85-94	(7) 95 +	(8) Total
