128200. (a) This article shall be known and may be cited as the Song-Brown Health Care Workforce Training Act.

(b) (1) The Legislature hereby finds and declares that physicians engaged in family medicine are in very short supply in California. The current emphasis placed on specialization in medical education has resulted in a shortage of physicians trained to provide comprehensive primary health care to families. The Legislature hereby declares that it regards the furtherance of a greater supply of competent family physicians to be a public purpose of great importance and further declares the establishment of the program pursuant to this article to be a desirable, necessary, and economical method of increasing the number of family physicians to provide needed medical services to the people of California. The Legislature further declares that it is to the benefit of the state to assist in increasing the number of competent family physicians graduated by colleges and universities of this state to provide primary health care services to families within the state.

(2) The Legislature finds that the shortage of family physicians can be improved by the placing of a higher priority by public and private medical schools, hospitals, and other health care delivery systems in this state, on the recruitment and improved training of medical students and residents to meet the need for family physicians. To help accomplish this goal, each medical school in California is encouraged to organize a strong family medicine program or department. It is the intent of the Legislature that the programs or departments be headed by a physician who possesses specialty certification in the field of family medicine, and has broad clinical experience in the field of family medicine.

(3) The Legislature further finds that encouraging the training of primary care physician's assistants and primary care nurse practitioners will assist in making primary health care services more accessible to the citizenry, and will, in conjunction with the training of family physicians, lead to an improved health care delivery system in California.

(4) Community hospitals in general and rural community hospitals in particular, as well as other health care delivery systems, are encouraged to develop family medicine residencies in affiliation or association with accredited medical schools, to help meet the need for family physicians in geographical areas of the state with recognized family primary health care needs. Utilization of expanded resources beyond university-based teaching hospitals should be emphasized, including facilities in rural areas wherever possible.

(5) The Legislature also finds and declares that nurses are in very short supply in California. The Legislature hereby declares that it regards the furtherance of a greater supply of nurses to be a public purpose of great importance and further declares the expansion of the program pursuant to this article to include nurses to be a desirable, necessary, and economical method of increasing the number of nurses to provide needed nursing services to the people of California.

(6) It is the intent of the Legislature to provide for a program designed primarily to increase the number of students and residents receiving quality education and training in the primary care specialties of family medicine, internal medicine, obstetrics and gynecology, and pediatrics and as primary care physician's assistants, primary care nurse practitioners, and registered nurses and to maximize the delivery of primary care family physician services to specific areas of California where there is a recognized unmet priority need. This program is intended to be implemented through contracts with accredited medical schools, teaching health centers, programs that train primary care physician's assistants, programs that train primary care nurse practitioners, programs that train registered nurses, hospitals, and other health care delivery systems based on per-student or per-resident capitation formulas. It is further intended by the Legislature that the programs will be
professionally and administratively accountable so that the maximum
cost-effectiveness will be achieved in meeting the professional
training standards and criteria set forth in this article and Article
2 (commencing with Section 128250).

128205. As used in this article, and Article 2 (commencing with
Section 128250), the following terms mean:
(a) "Family physician" means a primary care physician who is
prepared to and renders continued comprehensive and preventative
health care services to families and who has received specialized
training in an approved family medicine residency for three years
after graduation from an accredited medical school.
(b) "Primary care physician" means a physician who is prepared to
and renders continued comprehensive and preventative health care
services, and has received specialized training in the areas of
internal medicine, obstetrics and gynecology, or pediatrics.
(c) "Associated" and "affiliated" mean that relationship that
exists by virtue of a formal written agreement between a hospital or
other health care delivery system and an approved medical school that
pertains to the primary care or family medicine training program for
which state contract funds are sought.
(d) "Commission" means the California Healthcare Workforce Policy
Commission.
(e) "Programs that train primary care physician's assistants"
means a program that has been approved for the training of primary
care physician assistants pursuant to Section 3513 of the Business
and Professions Code.
(f) "Programs that train primary care nurse practitioners" means a
program that is operated by a California school of medicine or
nursing, or that is authorized by the Regents of the University of
California or by the Trustees of the California State University, or
that is approved by the Board of Registered Nursing.
(g) "Programs that train registered nurses" means a program that
is operated by a California school of nursing and approved by the
Board of Registered Nursing, or that is authorized by the Regents of
the University of California, the Trustees of the California State
University, or the Board of Governors of the California Community
Colleges, and that is approved by the Board of Registered Nursing.
(h) "Teaching health center" means a community-based ambulatory
patient care center that operates a primary care residency program.
Community-based ambulatory patient care settings include, but are not
limited to, federally qualified health centers, community mental
health centers, rural health clinics, health centers operated by the
Indian Health Service, an Indian tribe or tribal organization, or an
urban Indian organization, and entities receiving funds under Title X
of the federal Public Health Service Act (Public Law 91-572).

128207. Any reference in any code to the Health Manpower Policy
Commission is deemed a reference to the California Healthcare
Workforce Policy Commission.

128210. There is hereby created a state medical contract program
with accredited medical schools, teaching health centers, programs
that train primary care physician's assistants, programs that train
primary care nurse practitioners, programs that train registered
nurses, hospitals, and other health care delivery systems to increase
the number of students and residents receiving quality education and
training in the primary care specialties of family medicine,
internal medicine, obstetrics and gynecology, and pediatrics, or in
nursing and to maximize the delivery of primary care and family
physician services to specific areas of California where there is a
recognized unmet priority need for those services.
There is hereby created a California Healthcare Workforce Policy Commission. The commission shall be composed of 15 members who shall serve at the pleasure of their appointing authorities:

(a) Nine members appointed by the Governor, as follows:

(1) One representative of the University of California medical schools, from a nominee or nominees submitted by the University of California.

(2) One representative of the private medical or osteopathic schools accredited in California from individuals nominated by each of these schools.

(3) One representative of practicing family medicine physicians.

(4) One representative who is a practicing osteopathic physician or surgeon and who is board certified in either general or family medicine.

(5) One representative of undergraduate medical students in a family medicine program or residence in family medicine training.

(6) One representative of trainees in a primary care physician's assistant program or a practicing physician's assistant.

(7) One representative of trainees in a primary care nurse practitioners program or a practicing nurse practitioner.

(b) Two consumer representatives of the public who are not elected or appointed public officials, one appointed by the Speaker of the Assembly and one appointed by the Chairperson of the Senate Committee on Rules.

(c) Two representatives of practicing registered nurses, one appointed by the Speaker of the Assembly and one appointed by the Chairperson of the Senate Committee on Rules.

(d) Two representatives of students in a registered nurse training program, one appointed by the Speaker of the Assembly and one appointed by the Chairperson of the Senate Committee on Rules.

(e) The Deputy Director of the Healthcare Workforce Development Division in the Office of Statewide Health Planning and Development, from nominees submitted by the office director.

(f) Two consumer representatives of the public who are not elected or appointed public officials, one appointed by the Speaker of the Assembly and one appointed by the Chairperson of the Senate Committee on Rules.

The members of the commission, other than state employees, shall receive compensation of twenty-five dollars ($25) for each day's attendance at a commission meeting, in addition to actual and necessary travel expenses incurred in the course of attendance at a commission meeting.

The commission shall do all of the following:

(a) Identify specific areas of the state where unmet priority needs for dentists, physicians, and registered nurses exist.

(b) (1) Establish standards for primary care and family medicine training programs, primary care and family medicine residency programs, postgraduate osteopathic medical programs in primary care or family medicine, and primary care physician assistants programs and programs that train primary care nurse practitioners, including appropriate provisions to encourage primary care physicians, family physicians, osteopathic family physicians, primary care physician's assistants, and primary care nurse practitioners who receive training in accordance with this article and Article 2 (commencing with Section 128250) to provide needed services in areas of unmet need within the state. Standards for primary care and family medicine residency programs shall provide that all of the residency programs contracted for pursuant to this article and Article 2 (commencing with Section 128250) shall be approved by the Accreditation Council for Graduate Medical Education's Residency Review Committee for
Family Medicine, Internal Medicine, Pediatrics, or Obstetrics and Gynecology. Standards for postgraduate osteopathic medical programs in primary care and family medicine, as approved by the American Osteopathic Association Committee on Postdoctoral Training for interns and residents, shall be established to meet the requirements of this subdivision in order to ensure that those programs are comparable to the other programs specified in this subdivision. Every program shall include a component of training designed for medically underserved multicultural communities, lower socioeconomic neighborhoods, or rural communities, and shall be organized to prepare program graduates for service in those neighborhoods and communities. Medical schools receiving funds under this article and Article 2 (commencing with Section 128250) shall have programs or departments that recognize family medicine as a major independent specialty. Existence of a written agreement of affiliation or association between a hospital and an accredited medical school shall be regarded by the commission as a favorable factor in considering recommendations to the director for allocation of funds appropriated to the state medical contract program established under this article and Article 2 (commencing with Section 128250). Teaching health centers receiving funds under this article shall have programs or departments that recognize family medicine as a major independent specialty.

(2) For purposes of this subdivision, "primary care" and "family medicine" includes the general practice of medicine by osteopathic physicians.

(c) Establish standards for registered nurse training programs. The commission may accept those standards established by the Board of Registered Nursing.

(d) Review and make recommendations to the Director of the Office of Statewide Health Planning and Development concerning the funding of primary care and family medicine programs or departments and primary care and family medicine residencies and programs for the training of primary care physician assistants and primary care nurse practitioners that are submitted to the Healthcare Workforce Development Division for participation in the contract program established by this article and Article 2 (commencing with Section 128250). If the commission determines that a program proposal that has been approved for funding or that is the recipient of funds under this article and Article 2 (commencing with Section 128250) does not meet the standards established by the commission, it shall submit to the Director of the Office of Statewide Health Planning and Development and the Legislature a report detailing its objections. The commission may request the Office of Statewide Health Planning and Development to make advance allocations for program development costs from amounts appropriated for the purposes of this article and Article 2 (commencing with Section 128250).

(e) Review and make recommendations to the Director of the Office of Statewide Health Planning and Development concerning the funding of registered nurse training programs that are submitted to the Healthcare Workforce Development Division for participation in the contract program established by this article. If the commission determines that a program proposal that has been approved for funding or that is the recipient of funds under this article does not meet the standards established by the commission, it shall submit to the Director of the Office of Statewide Health Planning and Development and the Legislature a report detailing its objections. The commission may request the Office of Statewide Health Planning and Development to make advance allocations for program development costs from amounts appropriated for the purposes of this article.

(f) Establish contract criteria and single per-student and per-resident capitation formulas that shall determine the amounts to be transferred to institutions receiving contracts for the training of primary care and family medicine students and residents and primary care physician's assistants and primary care nurse practitioners and registered nurses pursuant to this article and Article 2 (commencing with Section 128250), except as otherwise provided in subdivision (d). Institutions applying for or in receipt of contracts pursuant to this article and Article 2 (commencing with Section 128250) may appeal to the director for waiver of these single
capitation formulas. The director may grant the waiver in exceptional cases upon a clear showing by the institution that a waiver is essential to the institution's ability to provide a program of a quality comparable to those provided by institutions that have not received waivers, taking into account the public interest in program cost-effectiveness. Recipients of funds appropriated by this article and Article 2 (commencing with Section 128250) shall, as a minimum, maintain the level of expenditure for family medicine or primary care physician's assistant or family care nurse practitioner training that was provided by the recipients during the 1973-74 fiscal year. Recipients of funds appropriated for registered nurse training pursuant to this article shall, as a minimum, maintain the level of expenditure for registered nurse training that was provided by recipients during the 2004-05 fiscal year. Funds appropriated under this article and Article 2 (commencing with Section 128250) shall be used to develop new programs or to expand existing programs, and shall not replace funds supporting current family medicine or registered nurse training programs. Institutions applying for or in receipt of contracts pursuant to this article and Article 2 (commencing with Section 128250) may appeal to the director for waiver of this maintenance of effort provision. The director may grant the waiver if he or she determines that there is reasonable and proper cause to grant the waiver.

(g) (1) Review and make recommendations to the Director of the Office of Statewide Health Planning and Development concerning the funding of special programs that may be funded on other than a capitation rate basis. These special programs may include the development and funding of the training of primary health care teams of primary care and family medicine residents or primary care or family physicians and primary care physician assistants or primary care nurse practitioners or registered nurses, undergraduate medical education programs in primary care or family medicine, and programs that link training programs and medically underserved communities in California that appear likely to result in the location and retention of training program graduates in those communities. These special programs also may include the development phase of new primary care or family medicine residency, primary care physician assistant programs, primary care nurse practitioner programs, or registered nurse programs.

(2) The commission shall establish standards and contract criteria for special programs recommended under this subdivision.

(h) Review and evaluate these programs regarding compliance with this article and Article 2 (commencing with Section 128250). One standard for evaluation shall be the number of recipients who, after completing the program, actually go on to serve in areas of unmet priority for primary care or family physicians in California or registered nurses who go on to serve in areas of unmet priority for registered nurses.

(i) Review and make recommendations to the Director of the Office of Statewide Health Planning and Development on the awarding of funds for the purpose of making loan assumption payments for medical students who contractually agree to enter a primary care specialty and practice primary care medicine for a minimum of three consecutive years following completion of a primary care residency training program pursuant to Article 2 (commencing with Section 128250).

128225.5. (a) The commission shall review and make recommendations to the Director of the Office of Statewide Health Planning and Development concerning the provision of grants pursuant to this section. In making recommendations, the commission shall give priority to residency programs that demonstrate all of the following:

(1) That the grant will be used to support new primary care physician slots.

(2) That priority in filling the position shall be given to physicians who have graduated from a California-based medical school.

(3) That the new primary care physician residency positions have been, or will be, approved by the Accreditation Council for Graduate Medical Education or the American Osteopathic Association prior to
the first distribution of grant funds.

(b) The director shall do both of the following:

(1) Determine whether the residency programs recommended by the commission meet the standards established by this section.

(2) Select and contract on behalf of the state with accredited primary care or family medicine residency programs for the purpose of providing grants for the support of newly created residency positions.

(c) This section does not apply to funding appropriated in the annual Budget Act for the Song-Brown Health Care Workforce Training Act (Article 1 (commencing with Section 128200)).

(d) This section shall be operative only if funds are appropriated in the Budget Act of 2014 for the purposes described in this section.

(e) This section shall remain in effect only until January 1, 2018, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2018, deletes or extends that date.

128230. When making recommendations to the Director of the Office of Statewide Health Planning and Development concerning the funding of primary care and family medicine programs or departments, primary care and family medicine residencies, and programs for the training of primary care physician assistants, primary care nurse practitioners, or registered nurses, the commission shall give priority to programs that have demonstrated success in the following areas:

(a) Actual placement of individuals in medically underserved areas.

(b) Success in attracting and admitting members of minority groups to the program.

(c) Success in attracting and admitting individuals who were former residents of medically underserved areas.

(d) Location of the program in a medically underserved area.

(e) The degree to which the program has agreed to accept individuals with an obligation to repay loans awarded pursuant to the Health Professions Education Fund.

128235. Pursuant to this article and Article 2 (commencing with Section 128250), the Director of the Office of Statewide Health Planning and Development shall do all of the following:

(a) Determine whether primary care and family medicine, primary care physician's assistant training program proposals, primary care nurse practitioner training program proposals, and registered nurse training program proposals submitted to the California Healthcare Workforce Policy Commission for participation in the state medical contract program established by this article and Article 2 (commencing with Section 128250) meet the standards established by the commission.

(b) Select and contract on behalf of the state with accredited medical schools, teaching health centers, programs that train primary care physician's assistants, programs that train primary care nurse practitioners, hospitals, and other health care delivery systems for the purpose of training undergraduate medical students and residents in the specialties of internal medicine, obstetrics and gynecology, pediatrics, and family medicine. Contracts shall be awarded to those institutions that best demonstrate the ability to provide quality education and training and to retain students and residents in specific areas of California where there is a recognized unmet priority need for primary care family physicians. Contracts shall be based upon the recommendations of the commission and in conformity with the contract criteria and program standards established by the commission.

(c) Select and contract on behalf of the state with programs that train registered nurses. Contracts shall be awarded to those institutions that best demonstrate the ability to provide quality
education and training and to retain students and residents in specific areas of California where there is a recognized unmet priority need for registered nurses. Contracts shall be based upon the recommendations of the commission and in conformity with the contract criteria and program standards established by the commission.

(d) Terminate, upon 30 days' written notice, the contract of any institution whose program does not meet the standards established by the commission or that otherwise does not maintain proper compliance with this part, except as otherwise provided in contracts entered into by the director pursuant to this article and Article 2 (commencing with Section 128250).

128240. The Director of the Office of Statewide Health Planning and Development shall adopt, amend, or repeal regulations as necessary to enforce this article and Article 2 (commencing with Section 128250), which shall include criteria that training programs must meet in order to qualify for waivers of single capitation formulas or maintenance of effort requirements authorized by Section 128250. Regulations for the administration of this chapter shall be adopted, amended, or repealed as provided in Chapter 3.5 (commencing with Section 11340) of Part 1 of Division 3 of Title 2 of the Government Code.

128240.1. The department shall adopt emergency regulations, as necessary to implement the changes made to this article by the act that added this section during the first year of the 2005-06 Regular Session, no later than September 30, 2005, unless notification of a delay is made to the Chair of the Joint Legislative Budget Committee prior to that date. The adoption of regulations implementing the applicable provisions of this act shall be deemed to be an emergency and necessary for the immediate preservation of the public peace, health, safety, or general welfare. The emergency regulations authorized by this section shall be submitted to the Office of Administrative Law for filing with the Secretary of State and shall remain in effect for no more than 180 days, by which time the final regulations shall be developed.

128241. The Office of Statewide Health Planning and Development shall develop alternative strategies to provide long-term stability and non-General Fund support for programs established pursuant to this article. The office shall report on these strategies to the legislative budget committees by February 1, 2005.
