*A hospital is classified as "Better" if the upper 95% CI of the RARR falls below the California observed readmission rate (13.15%). A hospital is classified as "Worse" if the lower 95% CI of the RARR is higher than the California observed readmission rate. A hospital’s performance is considered "Average" if the California readmission rate falls within the 95% CI of a hospital’s RARR.

† Hospitals submitted statements regarding this report. See Appendix G for their statements.
